

Is your HPE Nonstop working as hard as it could be?

Get an expert, independent view of your Nonstop system with Optimiser+

Stay ahead of the competition, lead with confidence and plan with clarity

Your Nonstop keeps everything running. But is it ready for what's next? Optimiser+ gives you and your team a clear, expert-led picture of where your Nonstop stands today, where it could go tomorrow, and how to get there.

What you get:

Expert-led, HPE-backed Delivered by TCM's Nonstop specialists in close collaboration with HPE, Optimiser+ gives you an impartial expert analysis that you can trust and use to align your Nonstop with your wider business strategy.

Clarity at every level The report covers 16 essential Nonstop subsystems, with a high-level overview for senior management and the depth your technical team needs to act on it. Findings are rated using the Optimiser+ Scale - a forward-focused model that shows not just where things stand, but what's possible.

Get ahead, stay ahead Optimiser+ shows you where best practice is already in place, where the opportunities are, and what needs attention next. Whether you're looking for stronger security, better performance, or making Nonstop a genuine enabler of innovation and growth.

Secure and safe The diagnostic works from configuration data only. We don't access any sensitive data or interfere with your live environment.

How it works:

1. Discover: We start with a conversation about your business, goals and how Nonstop fits your wider strategy, so the findings are relevant from the start.

2. Analyse: Our diagnostic tool assesses 16 essential subsystems, interpreted in context by our Nonstop experts.

3. Advance: We review findings with you, highlighting strengths before moving to clear, prioritised, jargon-free recommendations. The full report is yours via your personal dashboard.

4. Evolve: Available as a one-off, annual or periodic assessment, Optimiser+ grows with your business.

Typically delivered within one week, with minimal impact on your team.
